

# Title: "Empowering Accessibility: A Website for the Blind"

**Team Name: Omega**

**Sahil Yadav (Leader)**

**Raj Gupta**

**Raushan Kumar**

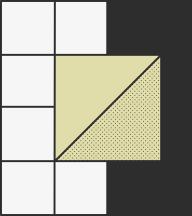

# Motivation Of Making This

Currently, there are an estimated **4.95** million blind persons and **70** million vision impaired persons in India, out of which **0.24** million are blind **children**. The motivation behind creating this website equality in the digital space. The reality is that traditional web interfaces pose significant hurdles for individuals with visual impairments.

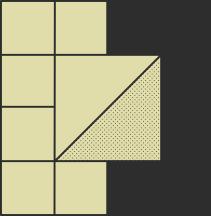

# Uniqueness Of WebSite

- Innovative Sound Assistance for an Inclusive Web Experience
- **Reading Books:** He/She can listen any pdf by uploading
- **Reading Newspapers:** Latest New will be voiceover by website
- **Sending Emails:** Person can send the email via text and voice
- **Music System:** They can listen the favourite music by just hover on the web

# Technology Used

- Tailwind Css

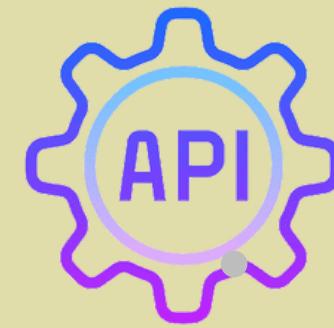

- Java Script

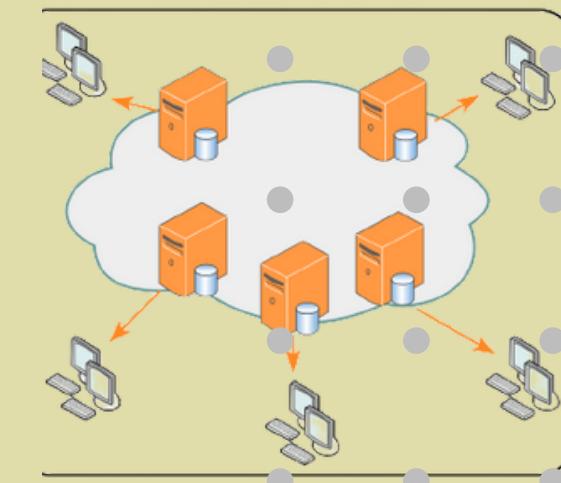

- Python

- API

- CDN

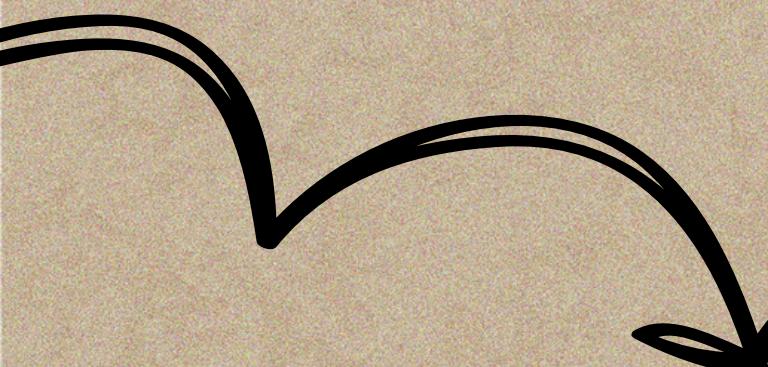

# Business Scope

- If we use the API of another website, the number of visitors will increase, allowing us to generate interest for that website.
- We can introduce paid features to offer even more interesting functionalities to users.
- Integrate into Browser extension

# Future Development

More features can be developed to enhance the website's functionality and user experience.

The ability to chat with different people through voice or text can be developed

We can create a database for storing the datasets, ensuring efficient data management and easy access for users

Thank  
You
